Documentation utilisateur EasySave v2.0 EN

1 - Main menu :

Upon arrival on the application, you will be greeted by the main menu. This will allow you to choose between 6 options:

- "View Jobs": Allows you to view Jobs and saved files.
- "Create a Job": Allows you to create a new Job.
- "Execute a Job": Allows you to execute a Job.
- "Modify a Job": Allows you to modify a Job.
- "Delete a Job": Allows you to delete a Job.
- "Settings": Allows you to modify the application settings.

2 - View Jobs:

This option allows you to view Jobs and saved files. They are displayed in two distinct lists. The first list allows you to view Jobs, the second list allows you to view saved files.

3 - Create a Job:

This option allows you to create a new Job. To do this, you must enter the following fields:

- Job name: You must enter the Job name.
- Source: You must enter the source path.
- Destination: You must enter the destination path.
- Backup type: You must enter the backup type.
- Encryption choice: You must choose whether you want to encrypt your files or not.

4 - Execute a Job:

This option allows you to execute a Job. The list of Jobs is displayed. You must select the Job you want to execute.

5 - Modify a Job:

This option allows you to modify a Job. The list of Jobs is displayed. You must select the Job you want to modify. You can then modify the Job information.

6 - Delete a Job:

This option allows you to delete a Job. The list of Jobs is displayed. You must select the Job you want to delete. You can then confirm the Job deletion.

7 - Settings:

This option allows you to modify the application settings. You can modify:

- The maximum number of Jobs.
- The folder for storing saved files.
- The path to CryptoSoft.
- The language of the application.
- The writing of logs in JSON format.
- The writing of logs in XML format.
